PROFESSIONAL SUMMARY

Full-stack and AI engineer with 10+ years of experience building and shipping web products with **Next.js, TypeScript, React, Node.js and PostgreSQL**, with AI built into the product: **Anthropic Claude API** integration, a production vision-based document-extraction pipeline (accuracy on affected credential types raised from ~70% to ~100%), and LLM generation in idempotent background jobs with retries, output validation and per-user cost caps. Owns the rest of the stack too: Stripe subscriptions and signed webhooks, third-party API integration, auth, Tailwind CSS, automated testing (Jest, Playwright) and deployment on AWS and Vercel. Built a live rental marketplace (frontend and backend) and a multi-tenant booking platform for a real client. Top Rated on Upwork with a 100% Job Success score.

CORE SKILLS

- **AI / LLM:** Anthropic Claude API, LLM integration, vision-based document data extraction, prompt engineering, output validation and fallbacks, background AI jobs (Inngest) with retries and cost caps, AI-assisted / agent-driven development (Claude Code)
- **Front-End:** TypeScript, React, Next.js (App Router, Server Actions), Tailwind CSS, Material-UI, Redux Toolkit, HTML5, CSS3, JavaScript, React Native, Radix UI
- **Back-End & APIs:** Node.js, Next.js route handlers, Express.js, NestJS, RESTful APIs and third-party API integration, Stripe (subscriptions, signed webhooks), event-driven jobs (Inngest), NextAuth, Zod, GraphQL, Python, Django
- **Database:** PostgreSQL (multi-schema), Prisma, MongoDB, Mongoose, MySQL, TypeORM
- **Deployment & DevOps:** AWS (CDK, ECS, EKS, S3/CloudFront), Google Cloud, Docker, Jenkins, Vercel, Netlify, Render, Railway, CI/CD, Turborepo/pnpm monorepos
- **Tools & Testing:** Jest, React Testing Library, Playwright, Cypress, Git/GitHub, Postman, Figma, Jira
- **Ways of Working:** Agile/Scrum, cross-functional collaboration, clear written communication

SELECTED PROJECTS

- **StoryKeep** (AI life-story writer, Stripe test mode): Next.js, TypeScript, PostgreSQL and the Anthropic Claude API. Claude generation runs in idempotent background jobs with retries and a per-user cost cap; Stripe subscriptions with dunning and signature-verified, replay-safe webhooks; PDF/DOCX export; 191 automated tests and CI. Built with AI assistance (Claude Code).
- **CityRoomFinder** (live rental and roommate marketplace with real users): built the frontend and the backend, including role-based dashboards and messaging. Performance pass: mobile Lighthouse 64 to 85, LCP 9.5s to 3.7s, desktop 83 to 100.
- **Discount Club** (multi-tenant booking platform for a real client): Next.js, TypeScript, Tailwind CSS and MongoDB. Owned the schema, passwordless login, admin tooling and email, from a single codebase on Vercel.
- **PlantPal** (React Native app, live on Google Play): Expo app with a Next.js API and PostgreSQL. Offline-first sync, push notifications, RevenueCat subscriptions with a signed, idempotent webhook, and 185 automated tests. Built with AI assistance (Claude Code).
- **MyMedDiary** (health research dashboard): React, TypeScript, Material-UI, charts and tests.

PROFESSIONAL EXPERIENCE

Evercred — Healthcare Credentialing SaaS (Remote)

Senior Full-Stack & AI Engineer (July 2025 – September 2026)

- Engineered a production, multi-tenant platform spanning physician, enterprise, and admin portals plus a document-processing microservice — built with Next.js 14, TypeScript, Prisma/PostgreSQL (multi-schema), and AWS (CDK/EKS).
- Fixed and completed the AI document pipeline as part of a team with a product owner and a dedicated QA team: a Python/Django service preprocesses documents (page splitting, image prep), then Claude's vision capability extracts structured fields (license numbers, names, dates) directly from the images, with prompt variants per document type. The pipeline existed but wasn't working reliably; I owned getting it to a fully working production version. Fixed real bugs: added a fallback that cross-checks the PDF's embedded text layer when extraction fails format validation, raising accuracy on affected credential types from ~70% to ~100%, and fixed nested JSON breaking the physician edit round-trip.
- Engineered event-driven background jobs (Inngest), NextAuth magic-link/OTP authentication, and Stripe subscription/webhook flows, with Zod-validated, user-scoped APIs and closed-loop cross-portal notifications.
- Worked in an **AI-assisted SDLC** using Claude Code and custom skills for grooming, code review, and QA; enforced strict type safety, migration-first database changes, and Playwright E2E coverage.
- **Tech Stack:** Next.js, React, TypeScript, Node.js, Prisma, PostgreSQL, Anthropic Claude API, Inngest, NextAuth, Zod, Tailwind, AWS (CDK/EKS/S3), Docker, Turborepo, Stripe, Playwright.

Turing | Google (Remote)

Full-Stack Web Developer (June 2024 – February 2025)

- Developed and maintained software for Google's Gemini project, enabling 800+ engineers to efficiently manage AI model training content.
- Streamlined content integration workflows to improve data accuracy and processing speed, collaborating closely with cross-functional teams.
- (Continued active freelance work via Upwork through this period and into the Evercred role that followed.)
- **Tech Stack:** React, NestJS, Redux, TypeORM, Python, MySQL, Figma, Git, JavaScript (JSX), Google Cloud, BigQuery, Jenkins, Node.js, RTL.

Upwork – Freelance (Remote)

Full-Stack Web Developer (October 2023 – Present)

- Provided technical solutions for startups (e.g., Expensify) via feature creation, bug fixes, and performance optimization.
- Developed custom web applications using Next.js, NestJS, React, and NodeJS, consistently earning high client satisfaction.
- **Tech Stack:** JavaScript, Next.js, NestJS, React, Redux, Material-UI, Tailwind, NodeJS, Express, MongoDB, Figma-to-HTML/CSS, Supabase, AWS, GCP.

BairesDev | Pinterest (Remote)

Full-Stack Web Developer (October 2021 – October 2023)

- Built an audience-sharing module for Pinterest's Advertiser Automation system, boosting campaign creation by 30% and receiving 90% positive user feedback.
- Implemented cross-browser compatibility and responsive design, ensuring a seamless user experience.
- **Tech Stack:** React, Redux, Cypress, MySQL, Figma, Git, JSX, JavaScript, Gestalt, Jenkins, NodeJS, Express, MongoDB, RTL.

BHD Bank (Hybrid, Santo Domingo)

Team Leader / Full-Stack Developer (December 2011 – October 2021)

- Led a team of four to deploy an anti-money-laundering prevention system, achieving low bug counts and a 95% client satisfaction rating.
- Addressed 20+ critical and 130+ non-critical bugs, ensuring consistent platform stability and improved user experiences.
- **Tech Stack:** C#, .NET Framework/Core, SQL Server, Oracle, React, jQuery, HTML/CSS, NodeJS, Git, Azure DevOps.

Earlier experience (2008–2011, web & e-commerce development) available on request.

EDUCATION

UNAPEC University, Santo Domingo, DR
Bachelor's Degree in Systems Engineering (2012)

CERTIFICATIONS

- 100 Days of Code: The Complete Python Pro Bootcamp — Udemy (2025)
- **MongoDB Node.js Developer Certification (2024)**
- Complete React Developer — Redux, Hooks, TypeScript, GraphQL, Firebase (2023)
- Complete React Native: Zero to Mastery (2022)
- Complete React Developer (2021)
- **Scrum Master Certification (2019)**

LANGUAGES

- **Spanish:** Native
- **English:** Advanced (B2)
