PROFESSIONAL SUMMARY

Results-driven Full-Stack Web Developer with 10+ years of experience building, optimizing, and scaling robust web applications for high-profile clients. Skilled in JavaScript/TypeScript, React, Next.js, and NodeJS, with production depth in **AI/LLM-powered products**, integrating the Anthropic Claude API into OCR and document-processing pipelines — and independently architecting full-stack platforms from database to deployment, including authentication, real-time messaging, and payments. Adept at leading cross-functional teams, mentoring junior developers, and collaborating with stakeholders to exceed project goals.

CORE SKILLS

- **Front-End:** HTML5, CSS3, JavaScript, TypeScript, React, Next.js (App Router, Server Actions), Vue, React Native, Redux, Tailwind, Radix UI, Material-UI
- **Back-End & APIs:** NodeJS, NestJS, Express.js, RESTful APIs, GraphQL, Python, Django, Zod, event-driven jobs (Inngest), NextAuth
- **AI / LLM:** Anthropic Claude API, LLM integration, OCR & document data extraction, prompt engineering, AI-assisted / agent-driven development
- **Database:** PostgreSQL (multi-schema), MySQL, MongoDB, SQL Server, Oracle, Prisma, Mongoose, TypeORM
- **Deployment & DevOps:** AWS (CDK, ECS, EKS, S3/CloudFront), Google Cloud, Docker, Jenkins, Vercel, Netlify, Render, Railway, CI/CD, Turborepo/pnpm monorepos
- **Tools & Testing:** Git/GitHub, Figma, Postman, Jest, React Testing Library, Playwright, Cypress, Jira
- **Project Management:** Agile/Scrum, Leadership, Cross-functional Collaboration

PROFESSIONAL EXPERIENCE

Evercred — Healthcare Credentialing SaaS (Remote)

Senior Full-Stack & AI Engineer (July 2025 – September 2026)

- Engineered a production, multi-tenant platform spanning physician, enterprise, and admin portals plus an OCR microservice — built with Next.js 14, TypeScript, Prisma/PostgreSQL (multi-schema), and AWS (CDK/EKS).
- Solo-built and owned the **AI document pipeline**: a Python/Django OCR service extracts structured fields (license numbers, names, dates) from documents, then the Claude API structures the data, with prompt variants per document type. Fixed real bugs: hidden PDF text layers leaking into AI prompts, and nested JSON breaking the physician edit round-trip.
- Engineered event-driven background jobs (Inngest), NextAuth magic-link/OTP authentication, and Stripe subscription/webhook flows, with Zod-validated, user-scoped APIs and closed-loop cross-portal notifications.
- Worked in an **AI-assisted SDLC** using Claude Code and custom skills for grooming, code review, and QA; enforced strict type safety, migration-first database changes, and Playwright E2E coverage.
- **Tech Stack:** Next.js, React, TypeScript, Node.js, Prisma, PostgreSQL, Anthropic Claude API, Inngest, NextAuth, Zod, Tailwind, AWS (CDK/EKS/S3), Docker, Turborepo, Stripe, Playwright.

Turing | Google (Remote)

Full-Stack Web Developer (June 2024 – February 2025)

- Developed and maintained software for Google's Gemini project, enabling 800+ engineers to efficiently manage AI model training content.
- Streamlined content integration workflows to improve data accuracy and processing speed, collaborating closely with cross-functional teams.
- (Continued active freelance work via Upwork through this period and into the Evercred role that followed.)
- **Tech Stack:** React, NestJS, Redux, TypeORM, Python, MySQL, Figma, Git, JavaScript (JSX), Google Cloud, BigQuery, Jenkins, Node.js, RTL.

Upwork – Freelance (Remote)

Full-Stack Web Developer (October 2023 – Present)

- Provided technical solutions for startups (e.g., Expensify) via feature creation, bug fixes, and performance optimization.
- Developed custom web applications using Next.js, NestJS, React, and NodeJS, consistently earning high client satisfaction.
- **Tech Stack:** JavaScript, Next.js, NestJS, React, Redux, Material-UI, Tailwind, NodeJS, Express, MongoDB, Figma-to-HTML/CSS, Supabase, AWS, GCP.

BairesDev | Pinterest (Remote)

Full-Stack Web Developer (October 2021 – October 2023)

- Built an audience-sharing module for Pinterest's Advertiser Automation system, boosting campaign creation by 30% and receiving 90% positive user feedback.
- Implemented cross-browser compatibility and responsive design, ensuring a seamless user experience.
- **Tech Stack:** React, Redux, Cypress, MySQL, Figma, Git, JSX, JavaScript, Gestalt, Jenkins, NodeJS, Express, MongoDB, RTL.

BHD Bank (Hybrid, Santo Domingo)

Team Leader / Full-Stack Developer (December 2011 – October 2021)

- Led a team of four to deploy an anti-money-laundering prevention system, achieving low bug counts and a 95% client satisfaction rating.
- Addressed 20+ critical and 130+ non-critical bugs, ensuring consistent platform stability and improved user experiences.
- **Tech Stack:** C#, .NET Framework/Core, SQL Server, Oracle, React, jQuery, HTML/CSS, NodeJS, Git, Azure DevOps.

Earlier experience (2008–2011, web & e-commerce development) available on request.

EDUCATION

UNAPEC University, Santo Domingo, DR

Bachelor's Degree in Systems Engineering (2012)

CERTIFICATIONS

- 100 Days of Code: The Complete Python Pro Bootcamp — Udemy (2025)
- **MongoDB Node.js Developer Certification (2024)**
- Complete React Developer — Redux, Hooks, TypeScript, GraphQL, Firebase (2023)
- Complete React Native: Zero to Mastery (2022)
- Complete React Developer (2021)
- **Scrum Master Certification (2019)**

LANGUAGES

- **Spanish:** Native
- **English:** Advanced (B2)
